

Gastro Detect

Expanding Surface Area Sampling

Increased Barrett's Detection. Easy Integration.

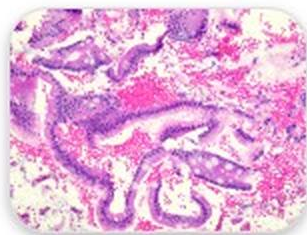

Enhanced Sampling

The brush is used in addition to targeted forceps biopsies to sample a broader area.

Expert Pathology Review

Reviewed by fellowship-trained GI pathologists specializing in the detection of Barrett's esophagus and dysplasia.

Improved Detection

Gastro Detect combines enhanced sampling with specialized GI pathology review to help identify findings that may otherwise be missed.

Designed To Complement—Not Replace—Forceps Biopsies.
